# The 9th International Conference on Multiscale Materials Modeling

Toward the next twenty years, opening new era in Multiscale Materials Modeling

## **The 9th International Conference on Multiscale Materials Modeling**

October 28 – November 2, 2018 | Osaka International Convention Center (Osaka, Japan)

We are happy to announce The 9th International Conference on Multiscale materials Modeling (MMM2018) that will be held at Osaka International Convention Center, Osaka, Japan on October 2018 – November 2, 2018.

The MMM conference is the world leading forum dedicated to the dissemination of the latest development in the field of multiscale materials modeling. The conference was initially started in 2002 in London, UK, and has been held every two years, in Europe, North America and Asia. The MMM conferences have gathered about 500 participants from around the world. In the last twenty years, Multiscale Materials Modeling (MMM) has dramatically grown and become a principal pillar of materials science and engineering through the eight landmark MMM meetings. MMM2018 brings in cutting edge studies in all aspects of materials theory, mathematics, modeling, simulation, and design, not only for developing fundamental MMM concept but also tackling more complex and practical multiscale problems directly linked to our life; fatigue, aging, corrosion, creep, wear and friction, chemical reaction, mechanics of biological and soft materials, avalanche, earth quake, energy conversion and storage, alloy and microstructure design, by tuning mechanical and functional properties, modeling complex materials, investigating materials under extreme condition and so on.

The venue of MMM2018 will be at Osaka International Convention Center: <http://www.gco.co.jp/en/> . It is located at Nakanoshima station, 1 minute by walk from Exit No.2 of the station on the Keihan line, in the center of Osaka City. Osaka International Convention Center has Main hall, Event Halls, Prayer Room, Poster session Hall, Conference Rooms, Waiting Room and so forth, also was founded as a joint venture between Osaka Prefecture and the Osaka business community.

Osaka is located at the center of Japan and easily accessed by limousine bus and/or train through Kansai airport from many cities abroad. The Conference attendees will be able to enjoy not only the multiscale materials modeling program but also the culture of Japan.

We are welcoming you to Osaka with many roses in full bloom at Nakanoshima-Park, in the vicinity of the Convention Center, and we hope all participants enjoy the exciting scientific and cultural program in October and November 2018 in Osaka.

Co-Chairs / Prof. Yoji Shibutani (Osaka University) ,  
Prof. Shigenobu Ogata (Osaka University)

Secretary / Prof. Tomotsugu Shimokawa (Kanazawa University)
